Atlantic Design Engineers, LLC

is a multidisciplinary consulting firm providing professional civil engineering services to residential, industrial and commercial private sector clients, the public sector, insurance companies, and banking institutions. Atlantic Design Engineers, LLC was founded in 1987 with the goal of providing the highest quality services and products in a timely and cost-effective manner.

Our staff of professionals and support personnel, including civil engineers and surveyors, environmental engineers and scientists, can handle all aspects of your project. We specialize in:

- Residential and Commercial Site Design
- Local, State, & Federal Permitting
- Land Planning
- Survey & Construction

ADE's Project Team Approach

utilizes our most qualified associates to provide the expertise needed to solve each project concern. A principal of the firm is overall project manager of each project, regardless of its size. We enjoy a strong reputation within the business and regulatory communities.

Atlantic's State-of-the-Art Tools

enable us to provide comprehensive design services on a timely basis through the use of fully automated CADD workstations and a wide variety of engineering software packages. Atlantic's computerized design capability includes coordinate geometry, subdivision/site layout, hydraulic and hydrologic design, traffic analysis, road plans and profiles, grading plans, topographic mapping, ground-water and air quality modeling, and landscape design.
